In connection with the definition re espionage to be inserted at the end of Directive No. 5, the State Department is agreeable but thinks that the parenthetical sentence which we had in our last CIA draft should remain -

"This Directive will not be construed to preclude counter-intelligence activities by Military Commands abroad and certain agreed activities by other Departments and Agencies" -  
which latter clause State wanted to add at the meeting the other day.

Army and Navy are  
dissenting from definition at  
end.
